

Corn

DID YOU KNOW?

A single bushel of corn will sweeten more than 400 cans of soda.

Farmers grow corn on every continent, except Antarctica.

Each tassel on a corn plant releases as many as 5 million grains of pollen.

Nebraska is a major producer of corn and ethanol.

There are over 20 operating ethanol plants in Nebraska.

Most of the corn you see growing in the fields is not corn people eat, but is produced to feed livestock.
