

# ***MIXER/LOADER TRAINING VERIFICATION***

As of July 20, 2002, the Nebraska Pesticide Act requires certification or training for anyone who mixes, loads, or disposes of restricted use pesticides, or any pesticide used in commercial lawn care, commercial structural pest control, or non-commercial outdoor vector control. The intent of this training is to provide people who handle, mix, or dispose of pesticides to receive correct information on how to protect themselves, the environment, and understand pesticide security issues. The Nebraska Department of Agriculture (NDA) will recognize approved training videotapes as a substitute for applicator certification. Any videotape training used for mixers/loaders must be approved by the NDA prior to use. Once the mixer/loader has received the approved training, the employer and the employee must sign this document and keep it, along with the approved training materials, for a period of three years, and make this information available to the NDA upon request. Training must be repeated every three years, similar to certification renewal.
